

# MAYANK KUMAR

Backend Developer

+91 7979852341 • exams.mayank1st@gmail.com • [Github](#) • [Portfolio](#) • Delhi-NCR, Delhi

## Summary

Backend Developer with 1 years of experience in backend development and database optimization, specializing in JavaScript and Node.js. Key achievements include developing automation systems that improved application performance by 30% and optimizing databases to increase operational efficiency. Seeking a Backend Developer position at GitHub, where I can contribute my backend development and database optimization skills to support the mission of innovating and facilitating collaborative and efficient software development.

## Education

|                                   |                   |
|-----------------------------------|-------------------|
| Masai School                      | Delhi-NCR, Delhi  |
| Full Stack Web Development        | 02/2024 - 09/2024 |
| SRM University, Sonipat           | Sonipat, Haryana  |
| Master of Computer Applications   | 06/2022 - 07/2024 |
| Yogoda Satsanga Mahavidyalaya     | Ranchi, Jharkhand |
| Bachelor of Computer Applications | 08/2018 - 04/2021 |

## Experience

|                                     |                   |
|-------------------------------------|-------------------|
| Regenesys Corporate Education India | Mumbai, India     |
| Backend Developer                   | 10/2024 - Present |

A global educational institution with 25+ years of experience, specializing in corporate training and customized learning solutions for business professionals across various sectors.

### Assessment Module & Student Profile System

- Developed a comprehensive student academic profile system with dynamic result visualization capabilities
- Built intelligent table population logic that auto-fetches and displays student results based on intake, program, and academic year parameters
- Implemented multi-qualification handling system to accommodate diverse academic pathways
- Created fully dynamic, program-specific result displays that adapt to individual student academic structures

### RMS Communication Module Enhancement

- Led comprehensive refactoring of database architecture and codebase across RMS, LMS, and DR teams to streamline inter-system communication
- Implemented automated email triggering and push notification systems, improving stakeholder communication workflows
- Integrated AWS SQS for reliable message queuing, ensuring scalable and fault-tolerant communication processing

### Automation Framework Development

- Designed and implemented an intelligent automation system that monitors student academic completion at the API level, automatically updating application statuses upon meeting all academic requirements.
- Engineered robust rollback mechanisms to handle data inconsistencies, ensuring system reliability and data integrity.
- Reduced manual processing time and improved application workflow efficiency.
- Established CI/CD pipeline using Jenkins for automated testing and deployment, ensuring consistent code quality and streamlined release cycles.

## Skills

JavaScript and Node.js · Redis and MongoDB · SQL and PostgreSQL · Git · Project management with Jira · Nest.js · JavaScript · MongoDB · REST · Node.js · AWS fundamentals · Jenkins

## Projects

### Sliced

Point On Scale Application for pizza ordering

- Designed and implemented a user-friendly interface for seamless pizza ordering using JavaFX, enhancing the customer experience
- Streamlined order processing and inventory management for pizza shop owners, improving efficiency
- Developed the application using Core Java and Eclipse, ensuring a robust and reliable performance
- Utilized CSS3 for styling to provide a visually appealing and modern design experience

### CoDe-Z

Collaborative coding platform for project collaboration

- Developed a collaborative coding platform using React.js and Node.js for real-time project collaboration
- Implemented secure session management and credential authentication using cookies and bcrypt
- Integrated Gemini AI for AI-driven code suggestions and project assistance to enhance user productivity
- Designed a responsive interface with Chakra UI and Bootstrap for cross-device compatibility
- Optimized backend functionalities with MongoDB and RESTful APIs, ensuring seamless frontend and backend integration

## Strengths

Problem Solving

Excellent problem-solving skills, able to navigate complex challenges in software development

Time Management

Strong time management skills, ensuring timely delivery of projects without compromising quality

## Interests

Creative Writing and Sketching

Enjoys sketching and writing poems and quotes, actively participating in creative expression through various forms

Sports Enthusiast

Avid volleyball player, participating in local tournaments and team-building events
